SARYAS JAF

Computer Engineer

+964 770 194 3308 saryas.jaf9@gmail.com Erbil, Pirmam road, Mass City

PROFILE

Strategic thinker and problem-solver with a strong background in software integration and user training, dedicated to optimizing IT processes. Experienced in collaborating with various stakeholders to align IT solutions with business goals, driving performance improvements. Adept at conducting audits and compliance checks to ensure adherence to regulatory standards. Looking to bring analytical skills and a proactive approach to a forward-thinking IT team.

Dynamic IT Engineer with hands-on experience in configuring and maintaining security systems, including CCTV and access control installations. Recognized for conducting thorough inspections and troubleshooting, ensuring optimal system performance and reliability. Passionate about providing training to staff, fostering a culture of security awareness and best practices. Positioned to contribute valuable insights and technical expertise to enhance organizational security measures.

WORK EXPERIENCE

Oak Leaf Company Jun 2025 - Present

IT Engineer

- Troubleshot and resolved hardware and software issues, minimizing downtime and enhancing user satisfaction.
- Maintained documentation of systems configurations and procedures to support compliance and knowledge sharing.
- Collaborated with vendors to negotiate contracts and ensure the best pricing for IT services and equipment.
- Managed user accounts and access controls, ensuring compliance with security policies.
- Led the integration of new software solutions, coordinating training and support for end-users.

EDUCATION

Computer Engineering - B.Sc. Degree
Ishik University
2012 - 2016 Erbil, Iraq

English language prep.
Ishik University
2011 - 2012 Erbil, Iraq

SKILLS

- Hardware Troubleshooting and Repair
- Software Troubleshooting
- Internet of Things (IoT) Solutions Design and Development
- Development Kits and Platforms
- Access Control Systems (ACS) Installation and Maintenance
- Electronic Board Design and Repair
- Programming: Java, PHP, MySQL, C++, Pine Script
- Custom PC building

LANGUAGES

- Kurdish (Native)
- Arabic (Fluent)
- English (Very good)

COURSES AND TRAINING:

- **Hardware Troubleshooting and Repair: Gained skills in diagnosing and resolving various hardware-related issues, including component failures and system optimization.**
- **Software Troubleshooting: Acquired knowledge in identifying and fixing software-related problems, such as operating system errors, application crashes, and compatibility issues.**
- **Internet of Things (IoT) Solutions Design and Development: Learned to design, develop, and implement IoT solutions for various applications, integrating smart devices and systems.**
- **Development Kits and Platforms: Trained in using Arduino, Raspberry Pi, and other development kits for rapid prototyping and testing of electronic systems.**
- **Access Control Systems (ACS) Installation and Maintenance: Gained expertise in installing, configuring, and maintaining various access control systems for optimal performance and security.**
- **Electronic Board Design and Repair: Learned the principles of electronic board design and acquired hands-on experience in diagnosing and fixing issues related to circuit boards and other electronic components**

Oak Leaf Company Mar 2021 - Jun 2025

Branch Manager

- Oversaw daily operations of the branch, ensuring compliance with company policies and regulatory guidelines.
- Cultivated strong relationships with clients, enhancing customer satisfaction and retention through personalized service.
- Lead a team of 14
- Collaborated with regional management to align branch goals with overall corporate strategy, driving consistent performance across locations.
- Prepared and presented reports to senior management, highlighting branch performance and areas for improvement.
- employees, providing coaching and mentorship to foster professional development and improve performance.

Crescent Petroleum-Khormor (Subcontractor from Oak Leaf Company) Jun 2019 - Jun 2021

ACS and CCTV Engineer

- Configured and maintained CCTV systems, ensuring optimal functionality and image clarity for surveillance operations.
- Conducted regular inspections and troubleshooting of security systems to identify and rectify issues promptly.
- Collaborated with cross-functional teams to integrate security solutions into existing infrastructures effectively.
- Provided training to staff on proper operation and maintenance of access control and CCTV systems.
- Monitored and analyzed system performance, making recommendations for upgrades to improve security efficiency.
- Responded to security incidents and generated reports detailing findings and corrective actions taken.
- Participated in ongoing professional development to stay current with technological advancements in security systems.
- Facilitated communication between clients and technical teams to deliver effective security solutions.
- Actively engaged in troubleshooting and repairing hardware and software issues in security systems.
- Installed and maintained access control systems Provided on-site and remote technical support, resolving hardware and software issues.

FINANCIAL MARKET COURSES

- Technical Analysis.
- Fundamental Analysis. Volume
- Spread Analysis. Inner Circle
- Trader Analysis. Smart Money
- Concept Analysis.

ACCOMPLISHMENTS

- Participated in International Engineering Conference (IEC 2016).
- How to Be a Successful and Professional. Engineer by Prof. Dr. David Scott 28th Feb 2017.
- Student Platform for Engineering Education and Development (SPEED) by Prof. Dr. Hans J Hoyer 28th Feb 2017.
- TEDxNishtiman, and various seminars on engineering and professional development

ACCOMPLISHMENTS

- Avid interest and curiosity in programming, driven by a passion for learning and exploring new languages and frameworks.
- Enthusiastic about discovering and adopting emerging technologies.

Volunteer IT Support May 2018 - May 2019

Branch Manager

- Provided technical assistance to users by troubleshooting hardware and software issues.
- Conducted training sessions for volunteers on best practices for using various software applications, enhancing overall team productivity.
- Monitored and resolved IT-related issues reported by staff, contributing to a more efficient work environment.
- Documented IT processes and solutions in a knowledge base, facilitating easier access to information for the team.
- Supported the deployment of new software applications, ensuring a smooth transition and minimal disruption to ongoing projects.
- Assisted with data backup and recovery processes to safeguard important organizational information.
- Engaged in regular maintenance of computer systems, which led to improved performance and user satisfaction.

Bernama Company Jun 2017 - Jun 2018

IT Support

- Provided technical support to end-users by troubleshooting hardware and software issues, ensuring high levels of customer satisfaction.
- Installed, configured, and maintained operating systems and applications to optimize performance and reliability.
- Conducted regular system updates and backups, reducing downtime and enhancing data security.
- Collaborated with cross-functional teams to identify and resolve technical issues, facilitating smooth business operations.
- Developed and maintained comprehensive documentation of IT procedures and support processes to enhance team knowledge sharing.
- Monitored and analyzed system performance metrics to proactively identify and address potential issues.
- Provided on-call support during critical incidents, maintaining operational continuity and minimizing disruptions.
- Participated in IT audits and compliance checks, ensuring adherence to industry standards and regulations.
- Engaged with users to gather feedback and suggestions, helping to improve IT services and support strategies.
